TELECOMMUNICATIONS AND RADIO ENGINEERING

CONTENTS FOR 1990

NUMBER 1

	Page English	Russian
PART I		
TELECOMMUNICATIONS		
COMMUNICATIONS NETWORK		
M.U. Bank and V.A. Suchilin: Forming of an Audio Signal Sample in Spectral Conversion	1	28
O.V. Mikhaylova and B.I. Shekhtman: Implementation of Discrete Cosine Conversion Processors	5	30
M.V. Gitlits and S.V. Bobrovnikov: Sampling in Digital Radio Broadcasting: Requirements for Converters and Methods of Error Calculation	10	32
A.I. Mikilev and S.E. Piterskikh: A Resonance Method of Measuring Tension in Drawing Optical Fibers	15	30
I.V. Samoylov: A Mathematical Model of a Field-Effect Transistor Power Amplifier	19	42
R.L. Mareyn: Improving the Objectivity of Image Quality Control at a TV Channel Output	22	11
M.N. Sapunkov and N.I. Kot: Separation of Video Signal Structures to Increase Efficiency of Facsimile Transmission	28	13
S. Ye. London, Ye. A. Petrov, M.A. Sivers, S.V. Tomashevich and Yu. I. Shestakov: Promising Radio Transmitters with Power Summation	31	15
M.N. Polyak and A.O. Talanov: Synthesis of Digital Filters for a Multichannel Corrector of Amplitude-Frequency Characteristics	36	17
V.V. Shitov, V.F. Chuprakov, R.A. Nekhorosheva and N.M. Kononova: An Armored Optical Fiber	40	39
I.I. Teumin: Approximate Calculation of the Shape of Output Signals in Single-Mode Optical Fibers	44	41
PART 2		
RADIO ENGINEERING		
ELECTRONIC CIRCUITS AND DEVICES		
V.N. Bezrukov: An Analysis of the Spectral Characteristics of Orthogonal Quasi-Periodic Sampling Structures in Television Systems	50	3
V.P. Yefimov, V.M. Tamarkin and P.G. Taranenko: An Accelerated Search for Compound Signals with a Multipeak Autocorrelation Function	54	7
Yu. G. Bulychev and A.A. Korotun: The Use of Lie Groups in the Problem of Compensating Systematic Errors in Radar Measurements	58	10
A.M. Bobkov: The Probability of Intermodulation Interference Falling within the Signal Frequency Band	61	13
M.I. Zhodzishskiy, V.V. Mykhortov and S. Yu. Sila-Novitskiy: An Analysis of Digital Systems for Tracking the Delay of a Pseudorandom Signal Modulated by a Flow of Binary Symbols	63	15
V.N. Kuleshov: Polyharmonic Analysis of Fluctuations in Self-Excited Oscillators	64	17
V.V. Blatov: Estimation of the Frequency of Signals from a Frequency Sample	71	23

ELECTRONIC CIRCUITS AND DEVICES		
V.N. Bezrukov: An Analysis of the Spectral Characteristics of Orthogonal Quasi-Periodic Sampling Structures in Television Systems	50	3
V.P. Yefimov, V.M. Tamarkin and P.G. Taranenko: An Accelerated Search for Compound Signals with a Multipeak Autocorrelation Function	54	7
Yu. G. Bulychev and A.A. Korotun: The Use of Lie Groups in the Problem of Compensating Systematic Errors in Radar Measurements	58	10
A.M. Bobkov: The Probability of Intermodulation Interference Falling within the Signal Frequency Band	61	13
M.I. Zhodzishskiy, V.V. Mykhortov and S. Yu. Sila-Novitskiy: An Analysis of Digital Systems for Tracking the Delay of a Pseudorandom Signal Modulated by a Flow of Binary Symbols	63	15
V.N. Kuleshov: Polyharmonic Analysis of Fluctuations in Self-Excited Oscillators	64	17
V.V. Blatov: Estimation of the Frequency of Signals from a Frequency Sample	71	23

	Page English	Page Russian
O.V. Gofayzen and N.I. Yepifanov: Effect of the Form of the Radio-System Amplitude Characteristic on the Accuracy of Linear Distortion Measurement	74	26
A.A. Titov: Design of the Interstage Correcting Circuit of a Multi-Octave Power Amplifier Based on Field-Effect Transistors	78	30
M.V. Tereshkin and A.K. Shashkin: The Probability Density of the Zeros of a Mixture of Amplitude-Modulated Signal and Noise	81	33
A.V. Lopatkin: A Microwave Circuit Analyzer with a Calibrated Eight-Pole Impedance Pickup	83	35
V.G. Sokolinskiy: The Passage of an FM Signal with a Limited Spectrum Through an Amplifier with Cutoff	85	36
O.I. Shelukhin and I.V. Belyakov: Detection of Markov Signals Using the Disorder Method in Non-Gaussian Noise	87	38
S.T. Bagdasaryan: Nontracking Measurement of a Signal Parameter when Its Amplitude and Initial Phase are a priori Uncertain	90	41
V.V. Zhitkov: A Procedure for Calculating the Cross Correlation Functions of Multiphase Signals with Different Bases	94	44
N.P. Khvorostenko: Multioperator Demodulation of Discrete Signals	96	46
G.G. Kile and S.M. Smol'skiy: Radio Signal Processing by Means of Self-Excited Oscillators with Additional Feedback	98	48
A.A. Bezruk: The Evaluation of a Random Field on a Background of Dependent Noise Using Gibbs Distributions	102	52
ANTENNA-WAVEGUIDE TECHNIQUES AND RADIOWAVE PROPAGATION		
L. Ye. Varakin: A Statistical Model of Multipath USW Propagation in a City	106	56
A.A. Potapov: Application of Modulated Millimeter Waves to Form and Identify Images	111	61
A.A. Yashchin: Mathematical Models for Synthesizing Devices Based on a Rib-Dielectric Transmission Line	115	65
V.D. Laptsev and Yu. I. Chernukhin: Approximation of the Frequency Dependence of the Primary Parameters of a Coaxial Cable	118	67
RADIOOPTICAL METHODS AND DEVICES		
A. Ts. Andreyev, B.S. Zafirova, G.D. Zartov, K.P. Panajotov and V.A. Sichugov: A Three-Channel All-Fiber Spectral Multiplexer Based on Interference Filters	120	69
N.A. Litsarev and A.A. Filitsin: The Effect of Intersymbol Interference on the Noise Immunity of Digital Data Transmission over Fiber Light Guides	123	72
V.N. Listvin, S.V. Shatalin and R.V. Yushkaitis: A Polarizing Autodyne Reflectometer	126	74
B.E. Mel'treger and V.E. Yakovlev: Statistical Error of Spectrum Estimation by an Analyzer Based on an Optical Fourier-Processor with Time Integration	130	78
COMPUTERS AND MICROPROCESSORS IN RADIO SYSTEMS		
I.V. Ognev, K.F. Sarychev and V.G. Dagurov: Error Correction in Cylindrical Magnetic Domain Memories	134	82
I.I. Postnikov: Computer Analysis of the Characteristics of High-Frequency Quartz Resonators	137	85
FOR THE ENGINEER		
V.M. Chervinskiy, A.S. Stoyanchenko and O.I. Vasil'kov: A Multifunctional Pickup of Load Mismatching	139	87
V.A. Filip and O.L. Klimenko: A Method of Optimizing a Class D Amplifier Feedback Loop	140	88
V.D. Stashuk: An Engineering Analysis of Transistor Devices under Direct-Current Conditions	143	90

	Page English	Russian
B.R. Ivanov and N.I. Tsybulenko: A Micro-Power Reference Voltage Source	145	93
V.S. Gurenko: A Method of Increasing the Upper Cutoff Frequency of Controlled Multivibrators with Emitter-Capacitance Coupling	148	95
A.N. Denisenko: A Method of Determining the Spectrum and Time Function of a Signal	150	97

NUMBER 2

PART 1
TELECOMMUNICATIONS

CABLE TELEVISION

N.A. Reushkin, A.V. Kosarev and N.N. Shergin: Calculation of Level Patterns in Cable Television Systems	1	7
G.I. Nikonov: Influence of Changes in Cable Attenuation on the Characteristics of a Distributed Cable TV Network	9	12

FIBER-OPTICS NETWORKS

A.I. Kugushev, V.P. Isakov and A.A. Kerimov: Calculation of the Passband of a Two-Section Multimode Optical Fiber	16	25

COMMERCIALS AND NETWORKS AND SWITCHING

I.E. Endal'tsev, E.I. Melik-Gaikazova, N.V. Pevtsov, S.N. Stepanov, and A.D. Kharkevich: Influence of Repeated Calls on a Direct Bunch of Channels in Intercity Networks	20	40
G.L. Jonin: An Approximate Method for Calculations the Probability Characteristics of Multilevel Switching Systems with Repeated Calls	26	45

PART 2
RADIO ENGINEERING

RADIO SYSTEMS

S.V. Novakovskiy and A.G. Galstyan: Development of Methods of Designing Video-Signal Interpolators	30	3
A.S. Bogachev and A.V. Ochnev: Optimization of Combined Data-Processing Algorithms in Multichannel Radio-Direction Finding	35	8
M.R. Kozlov: Noise Immunity of Diversity Reception of Frequency-Hopping Signals in the Presence of a Grid of Harmonic Interference	39	12
Yu. G. Bulychev, A.A. Korotun and A.P. Manin: Identification of Path Parameters from Measurements of a Moving Direction Finder	43	16
A.I. Perov: Adaptive Filtering of Signal-Field Parameters	46	19
V.Ye. Gantmakher and I.L. Chernova: Ternary Pulse Sequences	50	22

RADIOELECTRONIC NETWORKS AND DEVICES

Ye. Yu. Lavrenko and A.I. Luk'yanov: Special Features of the Synthesis of Matching Circuits of a Microwave Diode Mixer Taking into Account Higher Harmonics of the Heterodyne Oscillator	52	25
S.A. Belichenko and V.I. Pervushov: A Switched Oscillator Based on Bipolar Transistors with Transformerless Interstate Coupling	54	27
A.M. Donets and V.N. Fedosov: The Maximum Magnetic Permeability of Nonuniform Tapes of Magnetically Soft Materials	58	30
S.L. Yemelyanov and A.V. Kobzev: Adaptive Suppression of Sinusoidal Interference in a Bandpass Nonlinear Converter with a Polynomial Oscillatory Characteristic	60	32
Ye. Yu. Shchetinin: The Generation of Pseudo-Random Number Sequences	62	34
G.N. Prokhladin: Modeling of a Pulsed Phase-Locked Automatic Frequency Control System with a 3-rd Order Filter	64	35

	Page English	Page Russian
A.T. Mingazin: A Comparative Analysis of Recursive Digital Filters.....	66	38
S.E. Ydovin, V.N. Volynchuk, I.N. Zibrov, V.T. Koval'chuk and P.M. Povidayko: The Frequency Resolution of Digital Spectrum Analyzers	69	41
S.I. Miroshnichenko and A.V. Bogoslovskiy: Noncausal Digitally Tunable CCD Filter.....	73	44
DEPOSITED ARTICLE		
A.N. Bondarev: Effect of Digital Frequency Synthesizer Imperfections on Digital Receiver Characteristics.....	76	47
SIGNAL PROCESSING		
A.P. Trifonov and V.I. Parfenov: A Quasilikelihood Estimate of the Frequency of a Random Signal of Unknown Duration.....	78	49
A.V. Volkov: The Potential Accuracy of Estimates of the Pulse Repetition Period of Video Pulses.....	81	52
A.I. Khoroshavin: Incomplete Noise-Immune Coding of PCM Signals.....	83	54
V.A. Polyakov and R.G. Tolparev: A Method of Increasing the Reliability of One of the Detection Procedures.....	86	57
V.N. Garmash and A. Yu. Seryakov: The Phase of a Signal Received from an Arbitrarily Moving Point Source.....	89	59
ANTENNA-WAVEGUIDE TECHNIQUES AND RADIOWAVE PROPAGATION		
Yu. V. Yukhanov and V.G. Koshkid'ko: The Synthesis of an Antenna with a Plane Impedance Reflector.....	92	62
A.U. Zhil'tsov, A.V. Korolenkov and Yu. A. Chernov: The Comparative Effectiveness of Short-Wave Inphase Antennas Operating on a Marine Multihop Route.....	95	65
V.A. Somov and S.S. Vyaz'mitinova: Application of the Boundary-Wave Method for the Numerical Analysis of Mirror Antennas.....	99	69
A.B. Gershman and R.A. Ugrinovskiy: Estimation of the Angular Coordinates of Radiation Sources by Means of an Antenna Array with Unknown Global Geometry.....	102	71
O.N. Maslov: The Field of an Aperture Emitter of a Steady-State Noise Signal.....	104	74
RADIOOPTICAL METHODS AND DEVICES		
G.V. Merkishin: Selection of a Photoreceiver Structure When Estimating the Orientation of the Rectilinear Boundary of an Image Contour.....	108	77
V.A. Pastukhov and Ya. D. Shirman: The Variation of the Secondary Radiation When the Spectrum of the Probing Signal is Broadened.....	110	79
FOR THE ENGINEER		
A.V. Baranov, Yu. A. Bulin and I.G. Minkin: Temperature Stabilization of Tuned Microwave Power Amplifiers.....	114	82
O.M. Bondareva and A.I. Grigor'yev: Calculation of the Optimum Location of an Exciter in Mirror and Lens Antenna.....	117	84
S.V. Kashin: The Design of Lenses Made of Uniform Dielectric.....	119	87
I.A. Suslov: Optimization of the Parameters of a Video Amplifier Using a Microcalculator.....	121	88
Al' Khasaniye Khisham: Signal-to-Noise Ratio in the Case of Synchronous Diode Detection.....	125	91
M.I. Bogdanovich: A Program for the Graphical Derivation of the Results of Engineering Calculations.....	127	93

PART 1		
TELECOMMUNICATIONS		
FAX COMMUNICATIONS		
A.N. Kurochkin, B.V. Korop, V.S. Aleshin and E.B. Bronner: Status and Prospects for Document Telecommunications	1	1
Yu. A. Tamm: The Effect of Suppressing Harmonic Interference Using an Adaptive Equalizer	5	19
V.A. Rubtsov: Choice of Filter for Quantized Feedback of a Repeater	10	22
A.A. Vel'mozhina: A Method for Testing Data Transmission Programs and Channels	15	26
ANTENNAS AND FEEDERS		
Ya. L. Dribinskiy, L.V. Dribinskaya and O.P. Pavlova: Measurement of TV Transmitting Antenna Radiation Patterns	18	34
L.A. Bessonova, S. Ye. London and S.V. Tomashevich: A Broadband Directional Coupler	23	38
B. Yu. Kapilevich: Microwave Filters Based on Resonators with Stepped Wave Impedance	29	42
Ye. A. Anfilov, S.V. Denisova, L.P. Duzhich, G.A. Kon, V.D. Kuznetsov, G.K. Nikanorov and Yu. N. Nosov: A Wideband Transmitting USW FM TV Antenna in the 66-108 MHz Band	35	47
A.M. Model', V.M. Antonenko, I.Z. Berlyavskiy, V.I. Krutnikov and V.I. Chubis: Rotor-Type Waveguide Summing-Switching Devices	38	50
COMPUTERS IN COMMUNICATIONS		
L.D. Smetanin: Methods for Ensuring Operational Reliability of Switching Systems Software	41	53
V.E. Delimov and V.M. Kukovkina: Optimization of Execution Time for Connective Path Searching Programs of the Reserve Controller in Type 3 "Istok" Stations	45	56
A.G. Popova, V.M. K'drev: Analysis of the Call Servicing Process in Distributed Control Systems	48	58
PART 2		
RADIO ENGINEERING		
RADIO SYSTEMS		
L.A. Shkol'nyy and S.L. Glazkov: A Mathematical Model and the Statistical Characteristics of the Speckle-Structures of Radar Images Obtained by Synthesized-Aperture Radars	53	3
A.I. Yermakov: Consideration of the Random Nature of the Arrangement of Radioelectronic Apparatus when Evaluating Their Electromagnetic Compatibility	58	8
S. Ya. Zhuk and P.A. Yevlanov: Combined Filtering of the Parameters of Motion of a Target and Forms of Its Maneuver	63	12
Yu. A. Solov'yev: Potential Accuracy of the Simultaneous Evaluation of the Coordinates of a Group of Moving Targets	66	16
A.A. Pavlov: An Algorithm for Evaluating the Sensitivity of Discrete Radio-Electronic Tracking Systems, Optimal in the Sense of the Letov-Kalman Criterion	69	18
RADIO-ELECTRONIC CIRCUITS AND DEVICES		
V.B. Borisoglebskiy: The Output Signal Spectrum from a Switched ARC-Filter	73	22
Yu. V. Zavrazhnov, V.A. Shanin and E.V. Fedorova: A Series Diode Attenuator	77	26
N. Yu. Yermolova: A System for the Mutual Locking of Spatially Separated Oscillators	79	29

	Page English	Page Russian
V.N. Bronnikov and Yu. V. Vasil'yev: The Efficiency of the Relative Aperiodic Method of Digital Data Transmission Using a Combined Form of Modulation	82	31
A.I. Dvorson: A Digital Duty-Ratio Measuring Instrument	85	34
A.D. Sazonov and A.V. Pyshkov: An Engineering Procedure for Determining Microwave Transistor Impedances	88	37
A.A. Akhumyan, S.S. Gigoyan, B.A. Murmuzhev and R.M. Martirosyan: Millimeter-Band Ferrite Isolators Based on a Reflecting Polykor Dielectric Waveguide	92	41
G.V. Petrov and A.V. Khramov: A Nonlinear Model of a Field-Effect Transistor with Two Schottky Gates	94	43
V.A. Statsenko: A CCD-Based Spatial-Frequency Filter	98	46
SIGNAL PROCESSING		
M.A. Sokolov and V.I. Yarmolenko: Selection of the Wavefront Rounding Law of the Modulating Function for Angle-Modulated Digital Signal Transmission	101	50
V.I. Esipenko: A Method of Reducing the Effect of Modulating Interference	105	54
V.V. Blatov: Composition of the Distribution Laws of the Instantaneous Frequency of the Sum of a Sinusoidal Signal and Noise	108	57
V.A. Batukhtin: Minimum FSK Signal Systems	111	60
I.A. Efremov and N.N. Udalov: The Dynamics of a Delayed Phase-Locked Loop System	114	62
V.N. Antipov, O.P. Gulyaykin and V.A. Yefimov: Detection of a Narrowband Signal in Space-Correlated Interference	116	65
V.A. Vishnyakov: Frequency and Time-Delay Filtering of a Continuous FM Signal	120	68
ANTENNA-WAVEGUIDE TECHNIQUES AND RADIO WAVE PROPAGATION		
V.I. Vasin, I.V. Kaplun and V.V. Pyatibratov: An Evaluation of the Quality of Adaptive Spatial Processing Taking into Account Signal Decorrelation in the Receiving Channels of the Antenna Array	122	70
Ye. R. Maksimov: Spectrum of the Signal at the Output of a Discrete Phase Shifter	125	73
V.S. Filippov and V.I. Chulkov: Characteristics of Coaxial Waveguide Radiators in Plane Phased Antenna Arrays	129	76
V.V. Khoroshun: Optimization of the Spectral Characteristics of Strip-Type Arrays	131	79
M.T. Chokhonelidze: A Symmetrical IRIS in a Surface-Wave Line	134	81
D.A. Boyarskiy, N.I. Kliorin and V.G. Mirovskiy: Reflecting Properties of Screens Covered with Atmospheric Precipitation	136	83
V.A. Kolomeytsev and V.V. Yakovlev: Continuous Transitions for Matching a Rectangular Waveguide and a Rectangular Waveguide with a T-Ridge	140	86
RADIOOPTICAL METHODS AND DEVICES		
V.A. Bychkovskiy and A.V. Solov'yev: Equivalent Conversions of Planar Circuits with Antimetric Elements	144	91
B.G. Gorshkov and A. Yu. Kuzin: Characteristics of Fiber-Optic Interferometers when the Input Radiation is Amplitude Modulated	146	93
A.P. Trifonov and T.M. Ovchinnikova: An Estiamte of the Intensity of an Optical Signal with Unknown Time of Arrival	150	97
A.A. Aleksanyan, V.V. Vasyukov, V.V. Voronov, V.A. Gavrilenko, S.G. Degtyarev, V.K. Ivanilov, K.K. Nikitin and V.D. Romanchenko: A High-Efficiency Secondary Power Supply with a Transformerless Input	154	101

NUMBER 4

	Page English	Page Russian
PART 1		
TELECOMMUNICATIONS		
Yu. N. Kornyshev and V.I. Duz': The Accuracy of Evaluating Call Servicing Quality Characteristics in Communications Networks	1	23
SECTION HEADING		
V.V. Vasil'ev et al.: A Unit for Automatic Testing of Line Channels in Digital Communications Systems	9	30
A.A. Romanovskiy and E.E. Dvorsky: Solving Optimization Problems in Automatic Test and Control of Telecommunication Networks	14	7
V.I. Yarych: Current Overload Protection for Contactless Switches	19	13
B.S. Gol'dshteyn: Stored Program Control in a Unified Digital Call Distribution Stage for the Information Services of a Telephone Network	21	20
V. Kolesnikov, M. Bank, A. Sinil'nikov, V. Grigor'yev and M. Petrov: Experimental Digital Broadcasting Network	27	26
COMMUNICATIONS LINES AND SYSTEMS		
Superconducting Communications Cables	32	35
I.I. Grodnev: High-Temperature Superconducting Communications Cables	33	35
D. Ya. Gal'perovich, V.I. Grechkov, T.V. Korzhakova and B.K. Chostkovskiy: Superconducting Coaxial Pairs for Cable Communications	39	38
A.S. Brisker, Yu. M. Gusev, V.V. Il'in, Yu. Ye. Karpeshko and S.P. Orobinskiy: Spectral Compression for Fiber-Optic Metropolitan Telephone Network Lines	43	41
G.I. Khabibulina: An Evaluation of Assembly Reliability for Optical Fibers and Cables	47	43
PART 2		
RADIO ENGINEERING		
RADIO SYSTEMS		
A.P. Luznetsov, I.L. Svito and L. Yu. Shilin: Analysis of the Hold-In and Pull-In Ranges of a Pulse-Phase Automatic Frequency Control System	51	3
A.V. Korolenkov: Determination of the Transmission Coefficients of Decameter Waves Through a Reinforced-Concrete Wall with an Aperture	54	5
R.M. Kubova: MUF-F2 Prediction for Long-Range Radio Links Taking into Account Low-Lying Ionospheric Layers	56	8
A.S. Mosiyenko: Active RC-Network-Implementation of Local Correctors for Multichannel Transmission Systems	58	9
M.A. Vil'kotskiy, V.P. Knysh and A.G. Sidorovich: Determination of the Characteristics and Flaw Detection of Discrete Resonance Diffraction Structures Based on Near-Field Measurements	60	11
RADIO CIRCUITS AND DEVICES		
A.V. Khramov and V.A. Shchelokov: The Design of Self-Excited Oscillators Using Transistor Quasilinear S-Parameters	61	12
V.M. Bogachev and V.M. Demidov: A Practical Algorithm for Solving Systems of Parameter-Dependent Nonlinear Equations	64	15
A.V. Varel'dzhyan, V.N. Volodin, A. Yu. Goncharov and A.V. Trifonov: Bandpass ARC-Filters for High-Frequencies	68	19
A.I. Chizhov: Scattering Matrix of an AFR- and PFR-Optimum Transmission-Type Reactive Phase Shifter	71	21
L.G. Endovitskaya and V.I. Kaganov: Microwave Signal Adder with Failed Oscillator Disconnection	74	24
V.I. Gvozdev and V.A. Shepetina: A Broadband Phase-Shifter	77	27

	Page English	Page Russian
SIGNAL PROCESSING		
V.F. Komarovich, V.V. Nikitchenko and P.S. Vikhlyantsev: An Analysis of the Effect of Signal Bandwidth on the Estimate of Its Spatial Parameters	80	30
M.A. Ivanov: Quasicoherent Processing of Coded Signals with Nondifferential Modulation	84	34
L.A. Belov and D.G. Bukharov: The Generation of Coherent Frequency-Modulated Signals	88	37
L.A. Ovcharenko and V.N. Poddubnyy: The Noise Immunity of the Reception of Phase-Shift Keyed Signals on a Steady Interference Background	91	40
N.I. Borodin, I.P. Bukanov and V.V. Sokolov: The Synthesis of Generalized Secondary Sequences	93	42
A.G. Budarin: Effect of Fluctuations of the Quantization Period with Time on the Characteristic of Digital Frequency-Voltage Conversion	95	44
V.S. Golub: Demodulation of FM Oscillations with Conversion into PhFM and PFM	99	47
I.L. Korolev and L.A. Belov: High-Speed Programmable Phase and Time Mismatch Measuring Instruments in Frequency-Modulated Generating Systems	101	49
ANTENNA-WAVEGUIDE TECHNIQUES AND RADIOWAVE PROPAGATION		
L.G. Gazyan and D.N. Vladimirov: Effective Parameters of Artificial Dielectrics	103	51
A.P. Gorbachev and M. Ye. Uvarov: Synthesis of Double-Loop Directional Microwave Filters with Coupled Opposite Sides of the Resonators	105	52
A. Ye. Kurochkin: A Broadband Active Magnetic Antenna	108	55
N.N. Gorobets, M.V. Nesterenko and V.A. Petlenko: Resonance Characteristics of Thin Impedance Dipoles in a Cutoff Rectangular Waveguide	110	57
R.I. Rumyantsev: Spatial Filtering of Interference when Making Measurements in the Near Field of an Antenna	113	60
A.M. Tishchenko and N.N. Fedorov: An Estimate of the Scattering Characteristics of a Passive Repeater in a Radio Link	117	63
RADIOOPTICAL METHODS AND DEVICES		
V.M. Lukashev, I.A. Goncharenko and A.F. Rubtsov: An Optical Regenerator Based on a Hybrid Bistable Device	120	66
S.M. Zhminchenko, D.I. Mirovitskiy, V.L. Nazarov and N.N. Sebekina: The Complex Transfer Constant of the Microwave Subcarrier of Multimode Lightguides	123	68
N.M. Kozhevnikov, M. Yu. Lipovskaya, V.I. Molotkov, Ye. I. Potapov and A.I. Puchkova: A Multichannel Analog Fiber-Optic Telemetering System	125	71
Yu. V. Karabak: A Method of Increasing the Accuracy and Reliability of a Power Photometry System	129	74
Yu. V. Vaysleyb, V.N. Goncharov and M.N. Kovachevich: The Power Characteristics of Electrooptical Modulators	132	77
Ye. M. Privalov: Digital Tracking and Focusing Methods in Laser Reproduction Systems	134	79
V.G. Kartashev, S.V. Kuz'min and V.L. Skachkov: Diffraction in Pattern Shaping Circuits Based on Multibranch Saw Delay Lines	137	82
FOR THE ENGINEER		
Yu. F. Miropol'skiy: A Quadrature Converter for a Correlation Measuring Instrument	142	87
V.B. Dikhtyar: Design of Transistor Microwave Self-Excited Oscillators Using the Small-Signal Scattering Parameters	144	89

NUMBER 5

	Page English	Page Russian
PART 1		
TELECOMMUNICATIONS		
G.A. Kliger: Optimization of Distribution Feeders in SGD-Type Antennas	1	6
L.S. Kazanskiy: Decameter Band Elliptical Multibeam Antenna Arrays	4	8
V.I. Komissarov: Compensation of Self-Reflections in SW Feeder Lines	9	10
V.B. Broude: Investigation of Parameters of a Single-Conductor Type OB-Ye Travelling-Wave Antenna Based on the Method of Moments	12	12
L.G. Sodin and I.S. Fal'kovich: Investigation of the Trajectory Characteristics of SW Signals by Means of a Distributed Antenna Array	17	14
L.A. Bessonova, S. Ye. London and S.V. Tomashevich: A Broadband Antenna-Decoupling Device	20	19
L.S. Kazanskiy, A.D. Krasil'nikov and G.M. Rodina: Multipath Receiving Antenna Array for Decameter Waves	25	22
T.V. Kleparskaya, L.I. Kozhemyakina and L.L. Ploshay: Investigation of Stability to Thermal Shock of Multimode Optical Fiber Splices	28	38
B.S. Sergeyev and S.S. Loktyukhov: Single-Cycle Converters with Limited Collector Current	30	39
PART 2		
RADIO ENGINEERING		
RADIO SYSTEMS		
V.N. Damgov: Conversion Properties of Short-Range Autodyne Systems	35	5
O.S. Danilovich: Optimization of Radio Systems by Multivariant Dynamic Programming	43	13
RADIO-ELECTRONIC CIRCUITS AND DEVICES		
V.A. Neganov, N.G. Safronov and A.N. Kharitonov: A Nonreciprocal Electrically Controllable Microwave Attenuator	48	18
E.S. Borovitskaya and V.A. Kukushkin: Synthesis of Highly Selective Filters Based on Interdigital Transducer	49	19
V.A. Statsenko: Calculation of the Modes of Operation of a CCD Image Sensor	52	23
A.S. Kozlov, I.P. Puzynya, N.I. Tolstoukhov and I.B. Yakovkin: Surface Acoustic Wave Devices in a Radio Monitoring System	56	26
E.A. Volkov, D.N. Govorukhin and I.S. Ivanchenko: Elimination of the Blocking Effect in Radio Reciever Stages by Minimizing Intermodulation Distortion	57	27

PART 1
TELECOMMUNICATIONS

COMMUNICATION NETWORKS AND SWITCHING		
V.N. Maksimenko: Choice of Control Structure for Digial Switching Systems.....	1	28
A.B. Murdasov: Load Redistribution in Public Telephone Networks with Increase in the Capacity of Electronic Exchanges.....	5	33
V.M. Rodionova; Analysis of Telephone Channel State During Operation....	8	35
E.B. Yershova and Ye.A. Balanova: Optimizing a Microprocessor System for Processing Digital Switching System Address Information.....	13	25
V.A. Gorokhov, A.G. Popova, V.A. Bulanov and T.A. Bulanova: Choice of Connection Path in a Digital Switching System with Distributed Control.....	20	29
TELECOMMUNICATION LINES AND SYSTEMS		
G. Bichev, K. Nolev and P. Radev: Estimation of the Influence of the Group Signal Structure in Primary Digital Transmission Systems on the Energy Spectrum of the Alphabetic Code.....	25	31
S.V. Godlevskaya, R.R. Zabarauskas and I.V. Reznikov: Clock Generation for Synchronizing an Eye-Diagram Observation Unit.....	27	32
I.G. Malkenson and V.A. Tamansky: Computer Optimization in Grouping Transmission Lines and Channels in Primary Trunk.....	31	17

	Page English	Page Russian
S.G. Pavlov: Analysis of the Limits in Using the Inductive Method for Locating Breaks in the Core of Communications Cables.....	36	22
O.N. Makeyev, Ye. A. Zarkevich and V.I. Smirnov: Analysis of the Basic Characteristics of High-Speed Fiber-Optic Transmission Systems.....	41	18
S.G. Akopov, V.N. Korshunov, B.S. Solov'yev and B.N. Fomichev: Evaluation of the Characteristics of Random Spatial Processes of Distribution.	45	20
V. Sh. Berikashvili, M.N. Kozlov, I.I. Kolbin, Vasquez Luna X. Guadalupe, I.V. Cheremiskin and T.K. Chekhlova: Video Diagnostics of Geometric Parameters of Monomode Optical Fibers.....	49	22
I.I. Grodnev and V.V. Bukovskiy: Determination of the Dispersion Characteristics of Three-Layer Monomode Optical Fibers.....	52	23
S.P. Gurdzhi and V.B. Katok: Calculation of Losses in Monomode Fiber Splices with a Complex Refractive Index Profile.....	55	25
G.A. Cherenkov and T.A. Martynova: Selective Light Input and Output in Fiber-Optic Transmission Systems.....	60	31
Yu. N. Zhivlyuk and Yu. I. Rzhavin: An Investigation of a Pressure Gauge Based on W-Lightguides.....	65	34
O.V. Bondarenko and V.G. Uglitskiy: Prediction of a Control Parameter for Fiber-Optic Elements from Results of Incomplete Tests.....	68	36
P.G. Kasherininov, A.V. Kichayev, Yu. N. Perepelitsyn, Yu. O. Semenov, and I.D. Yaroshetskiy: Light-Controlled Optical Elements for Optical Processing of Information and the Fiber-Optic Links.....	71	37

PART 2
RADIO ENGINEERING

RADIO SYSTEMS

A. Yu. Shcheglov: An Algorithm for the Discrete Selection of Complex Radio Systems.....	76	3
V.M. Shlyakhin: Estimation of the Resolving Power of a Synthetic Aperture Radar Under Noise Conditions.....	79	6
V.I. Zhuravlev and A.B. Tsarev: The Use of the Properties of Decimation and Redecimation of M-Sequences in Radio Systems.....	82	8
A.B. Gershman, V.T. Yermolayev and G.V. Serebryakov: Analysis of Spatial Smoothing Methods in Problems of the Angular Correlation of Signals	85	11

RADIO CIRCUITS AND DEVICES

Yu. A. Yevstifeyev: A Simple Economical Method of Analyzing Multiperiod Electronic Circuits.....	88	18
V.R. Nikogosyan: A Reference Frequency Generator Based on a SAW Oscillator.....	91	21
G.N. Prokhladin: A Programmable Frequency Divider for Microwave Synthesizers.....	93	23
Yu. M. Zel'din: An Active Amplitude-Shift Keyer Controlled by a Passive Switching Element.....	95	24
V.P. Petrenko: A Microstrip Phase Corrector Based on a Combination of Transmission Lines.....	98	27
A.R. Tagilayev: Analog Microwave Phase Shifters.....	100	29
A.V. Kiselev and I.S. Tyryshkin: A Method of Improving the Filtering Properties of Weight Functions with a Stepped Change in Amplitude..	102	31

SIGNAL PROCESSING

V.G. Tsiporenko and E.D. Tsiporenko: Spectral Estimate of Analog-to-Digital Signal Conversion Error.....	104	32
A.I. Tyazhev: Combatting Limit Cycles in Recursive Digital Filters.....	107	34
M.V. Ratynskiy: Effectiveness of Spatial Filtering as a Function of the Number and Position of Interference Sources.....	110	37
A.S. Arutyunov, L.I. Byalyi and A. Yu. Vostropyatov: Adaptive Spatial Filtering with Weak Interference.....	113	40

PART 1		
TELECOMMUNICATIONS		
E.A. Shevtsov: Effect of Filtering the Signal and Noise in an Amplifier, on the Sensitivity Threshold of a Fiber-Optic Photoreceiver	1	40
G.I. Gordon, P.A. Mishnayevskiy and P.P. Ovvyan: Determination of the Basic Parameters of Lasers and Fibers Used in High-Speed Fiber-Optic Transmission Systems with Long Regeneration Sections	7	43
I.R. Berganov, R.I. Isayev and B.M. Makhkamdzhanov: Investigation of a Self-Contained Solar Power Source for Fiber-Optic Transmission Systems	11	45
L.M. Polyak: Determination of Multilevel Signal Energy Spectra by Standard Personal Computer Programs	17	6
Yu. M. Trenovskaya and N. Khr. Durchev: Computer Model of Digital Transmission System Line Channels	22	8
I.S. Braynina: Digital Harmonic Signal Detectors for a Baseband PCM Digital Stream	26	10
B.M. Kats, V.P. Meshchanov and A.L. Khvalin: New Types of Coupled Coaxial Lines for Precision Microwave Directional Couplers	32	13
V.I. Meykshan: Estimation of the Effect of Equipment Reliability on the Performance of Systems with Losses and Waiting	37	30
A.A. Bokunyaev, L.F. Zakharov, M.F. Kolkanov and G.S. Stoyanov: Analysis of a REsonant Half-Wave Voltage Converter with a Reversed Diode	42	32

	Page English	Page Russian
V.N. Voinov, I.S. Goryanskiy, A.E. Shestovskikh and D.M. Seledkov: Analysis of Resonant Inverter Output Current Quality.....	46	34
S.S. Kogan, S. Ya. Baksman, N.V. Mokhovikov, A.L. Osherovich: Secondary Group Tandem Filter Employing Lithium Tantalate Resonators.....	50	39
P.G. Kaplunov and V.E. Chernyy: Estimation of the Effect of Two-Path Radiowave Propagation on the Operation of Digital Radio-Relay Links	56	42
V.I. Boykov: Use of Radio Channel Lifetime on a Meteor Communications Link.....	59	44
SATELLITE COMMUNICATIONS		
V.A. Blokhin: Intermodulation Distortions in Klystrons and Traveling-Waves Tubes for Multiple Signal Amplification.....	62	45
PART 2		
RADIO ENGINEERING		
RADIO SYSTEMS		
V.N. Privalov: Features of the Measurements of the Angular Coordinates of a Target When There are Tropospheric Signal Distortions.....	66	3
V.A. Saprykin and S.I. Tynyankin: The Mellin Uncertainty Function.....	69	6
RADIO CIRCUITS AND DEVICES		
N.I. Smirnov, I.V. Sizov and A.R. Petrov: The Generation of Multifrequency Quasicoherent Complex PSK Signals by Means of SAW Devices...	72	10
Yu. A. Lazunin and A.G. Fefelov: A Monolithic Microwave Power Limiter...	76	14
V.M. Bogachev and V.M. Demidov: The Generation of Symbol Circuit Functions Taking Their "Sparseness" into Account.....	78	16
G.N. Prokhladin: The Double T-Bridge in Frequency Synthesizers.....	82	19
V.A. Dvinskikh: An Estimate on Personal Computers of the Stability of Feedback Amplifiers Using the Nyquist Criterion.....	84	21
A.R. Tagilayev: Broadband Discrete Microwave Attenuators.....	88	24
A.P. Trifonov and S.V. Vetrov: A Sequential Detector of Continuous Gravitational Radiation of Decreasing Frequency.....	89	26
V.K. Sakharov: Estimation of the Sensitivity of an Optical Fiber Gravitational Wave Detector.....	93	29
SIGNAL PROCESSING		
V.D. Bukharin, B.I. Orekhov, A.A. Garnaker'yan and V.B. Skorik: Investigation of the Energy Characteristics of a Signal Reflected from a Statistically Irregular Surface.....	96	32
A.N. Bondarev, M.I. Zhodzishskiy and S. Yu. Sila-Novitskiy: Range Measurement Using Digital Radio-Signal Receivers.....	100	36
I.A. Golyanitskiy: Multiposition Signal Detectors with Normal Interference Compensation.....	105	40
V.N. Taran and K.A. Chasnyk: A Digital Signal Delay Method.....	108	43
G.M. Bashin: Invariant Single-Sample Incoherent Detection of a Signal of Unknown Position Against a Background of Gaussian Interference of Unknown Intensity.....	110	45
ANTENNA-WAVEGUIDE TECHNIQUES AND RADIOWAVE PROPAGATION		
Ya. N. Fel'd: Inverse Problems of the Antenna Theory and the Criteria for the Obtainability of Radiation Patterns.....	113	52
Yu. V. Pimenov and D.A. Khod'kov: The Radiation of an Elementary Electric Dipole Located over a Plane Rectangular Screen.....	121	60
S. Yu. Borisov and D.M. Sazonov: A Method of Increasing the Accuracy of Phase Measurements in the Amplitude-Phase Method of Antenna Measurements.....	124	63
A.V. Khokhlov: Measurement of the Stokes Parameters of Partially Polarized Waves Using a Differential Modulation Method.....	127	65

	Page English	Page Russian
OPTICAL METHODS IN NEW INFORMATION TECHNOLOGIES		
N.N. Yevtikhiyev and D.I. Mirovitskiy: Coherent-Optical Waveguide Devices for the Transmission, Processing, and Storage of Information.	131	69
A.I. Kugushev: Basic Characteristics of Multisection Mode Mixers.....	140	79
FOR THE ENGINEER		
D.V. Igumnov and V.A. Maslovskiy: Rectifying Element Based on MOS Transistors.....	143	82
N.G. Vorob'yev, A.I. Gordeyev and N.B. Petyashin: The Choice of Transistors for Power Switches.....	145	84
V.G. Il'yenkov, S.N. Kuznetsov and A.A. Ivanov: Special Features of the Design of a Converter-Type Low-Pass Filter.....	147	86
L.S. Vilenchik: Relay to the Remarks on the Paper Entitle "Calculation of Prolate Spheroidal Wave Functions".....	149	88
V.A. Suchilin: Remarks on the Paper by L.S. vilenchik et al. Entitled "Calculation of Prolate Spheroidal Wave Functions" (Radiotekhnika, No. 3, 1989).....	150	88
S.M. Sarayev: Remarks on the Paper by A.L. Fabrikant Entitled "A Method of Increasing the Selectivity in the Side Channels of Receivers" (Radiotekhnika, No. 3, 1989).....	150	89
A.L. Fabrikant: Reply to the Remarks on the Paper Entitled "A Method of Increasing the Selectivity in the Side Channels of Receivers".....	151	89
